

ITS NOT JUST AN OIL - IT'S A SMART BLEND

TetraCURB™ MAX is a biopesticide that controls mites and a wide range of small, soft-bodied insects on all crops. TetraCURB MAX is not just a traditional horticultural oil insecticide; it is a **SMART BLEND** of sustainable active ingredients in a sophisticated carrier of functional ingredients.

The actives are premium botanical oils rich in insecticidal compounds responsible for the multiple modes of action, making it an excellent tool for resistance management. The formulation is composed of: **Emulsifiers** that create a stable and homogeneous sprayable emulsion; **adjuvants** that enhance the wetting and uniform contact spray on the plant surface for maximum efficacy with minimum phytotoxicity; and **synergistic solvents** that maximize the delivery of the active ingredients to the target site more efficiently.

TetraCURB MAX is an excellent biological crop protection tool to rotate in a sustainable IPM program.

ACTIVE INGREDIENTS:

Castor oil.....	20%
Rosemary oil	10%
Clove oil	3%
Peppermint oil.....	2%

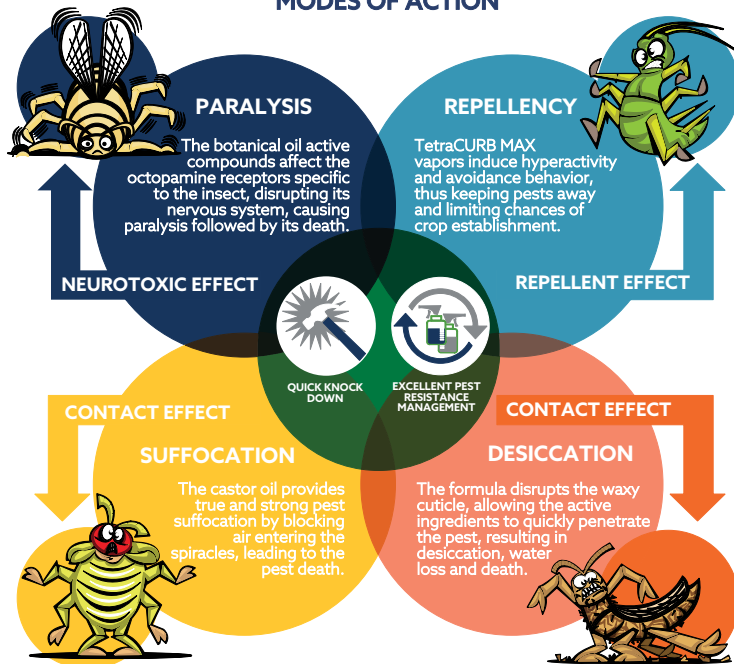

INERT INGREDIENTS:

Glycerol monooleate, Sorbitol, Isopropyl myristate, Butyl lactate, Lauric acid, Vanillin, Myristic acid, Palmitic acid, Stearic acid, Oleic acid.

TARGET PESTS CONTROLLED:

Broad-spectrum control of mites and small, soft-bodied insects including but not limited to aphids, whiteflies, thrips, mealybugs, lygus, etc.

MODES OF ACTION

Convenient to use

Worker Safety

Sustainable Biological Crop Input

MRL Exempt

No Label Restrictions & Limitations

No Phytotoxicity Observed

Minimal PPE

DIRECTIONS FOR USE

Integrated Pest Management

ALWAYS READ AND FOLLOW LABEL DIRECTIONS | SHAKE WELL BEFORE USE | USE DILUTION IMMEDIATELY | DO NOT STORE DILUTED SOLUTION

USE SITES:

All commercial specialty crops, indoor and outdoor, including greenhouse, nursery, hop, hemp and cannabis

MIXING INSTRUCTIONS:

- TetraCURB MAX is a smart blend. The use of adjuvants is not required
- This product is a concentrate and must be diluted before using

- 1) Fill a clean tank with half the amount of clean water
- 2) Add TetraCURB MAX at the desired application rate
- 3) Fill the tank with the remaining amount of water and mix until homogeneous
- 4) Spray on plants to achieve complete foliar coverage until runoff

APPLICATION TIMING:

- Year-round use. TetraCURB MAX doesn't have label restrictions or limitations on the number of applications per cropping season.
- Do not apply to plants under stress or when the temperature is 90°F or above

EQUIPMENT: Standard commercial sprayer

PACKAGING SIZES:

1 Gallon (case of 4) | 2.5 Gallons (case of 2) | Tote (275 gallons).
