

**FOR IMMEDIATE RELEASE:**

**Kemin is pleased to announce their
European Tour featuring Prof. Charles Schwab:
*Mastering the Amino Acid Balance***

Herentals, Belgium – January 22, 2008 – Kemin announced today their Second European Meeting to be held during April this year in collaboration with Prof. Charles Schwab from the University of New Hampshire in the USA. The event will take place in 6 countries around Europe, with the aim of further extending scientific knowledge and showing practical economic benefits achieved from Amino Acids.

The adoption of the concept of balancing diets for amino acids (AA) continues to increase in the United States and in Europe. However, the increase in the rate of implementation, as measured largely by sales of protected methionine (Met), has been tied largely to differences in milk prices and feed costs with adoption being slowest when feed costs are high and prices for milk and milk protein are lower. However, it has been my experience, says Prof. Schwab, that even when milk prices have been at their lowest long term financial benefits could be realized by balancing for AA.

We are delighted to have Prof. Schwab again with us in 6 countries, says Dr. Lyndon Davies of Kemin. Prof. Schwab is widely recognized for his research on amino acid nutrition of dairy cattle. Prof. Schwab has made over 100 presentations at dairy nutrition conferences and workshops in the last 10 years on the application of advances in amino acid and protein nutrition for more efficient use of feed protein for milk production. After his highly respected lecture at our European Conference in Belgium last year, we immediately decided to invite Prof. Schwab again for a tour to 6 different European countries to give our customers the opportunity to have in depth discussions taking into account their local conditions. In addition to Prof. Schwab every conference will have well known local speakers from Research Centres, Universities or the industry.

Tour Calendar

Date	Location	Local Speakers
April 14	Penkridge, UK	Prof. Sinclair Mayne, Prof. Ian Givens, Dr. Phil Garnsworthy
April 16	Billund, Denmark	Mr. Jens Møller, Drs. Mogens Larson, Mr. Ejnar Jensen
April 17	Hamburg, Germany	Dr. Katrin Mahlkow-Nerge, Mr. Dieter Mirbach
April 18	Wittstock, Germany	Dr. Katrin Mahlkow-Nerge
April 21	Lugo, Spain	Mr. Angel Avila
April 22	Zaragosa, Spain	Mr. Angel Avila
April 23	Carpi, Italy	Dr. Formigoni
April 25	Laval, France	Mr. Enjalbert, Prof. Rulquin

Participation by invitation only, please contact Kemin for more information
Conference language: English + translation

Kemin – Inspired Molecular Solutions.

Founded in 1961, Kemin Industries Inc. (www.kemin.com) provides health and nutritional solutions to the Agrifoods, Food Ingredients, Pet Food and Human Health and Pharmaceutical Industries. Kemin operates in more than 60 countries with manufacturing facilities in Belgium, Brazil, China, India, Singapore, South Africa, Thailand and the United States.

The Agrifoods businesses of Kemin focus on **TOTAL NUTRITION**[®] to help its customers achieve a highly effective, consistent system of profitable animal production. Rather than all out production at minimum cost, success in the future will instead be measured by achieving satisfactory balance between production enhancement and managing disease; ensuring food quality and safety; minimizing the impact of production on the environment; and achieving consumer satisfaction. Finding and maintaining the critical balance between all these considerations is the basis for **TOTAL NUTRITION**[®].
