

Broiler

PRODUCT PORTFOLIO

Kemin uses advanced molecular science to develop industry-leading solutions for broiler gut health, nutrition, feed quality, and pathogen control. It's just one of the ways we sustainably transform the quality of life every day for 80% of the world with our 500+ ingredients, which are all backed by technical, lab, and product support. This ensures you have a partnership where you get the most out of every product. We use our decades of experience and scientific expertise to unlock discoveries that improve broiler health and performance — from better immune function to nutrient absorption.

Meet Your Kemin Broiler Team

Kemin Animal Nutrition and Health has an expansive team of technical, sales, and marketing experts in the poultry market, along with a legacy of building relationships and leveraging expertise to maximize your production potential.
