

# RUMINANT GUT HEALTH TRIPLE CHECK

Establish the intestinal integrity and protection your livestock need, using our Gut Health Triple Check program.

The Gut Health Triple Check program serves as a support system to **CLEAN UP** contaminants in feed and water prior to animal exposure, **BUILD UP** intestinal strength and immunity to reduce leaky gut and **KNOCK OUT** harmful pathogens for healthier and better performing animals.

## CLEAN UP

Target specific profit-robbing contaminants in fat, grain, water and finished feed.

- ✓ ENDOX®
- ✓ Acid LAC™
- ✓ KALLSIL™
- ✓ Feed CURB®
- ✓ Myco CURB®
- ✓ CURB® RM Extra
- ✓ Ammo CURB® 85
- ✓ RENDOX®

## BUILD UP

Strengthen the intestinal barrier and immune system to maximize nutrient absorption and inhibit harmful pathogens or toxins.

- ✓ KemTRACE® Chromium

## KNOCK OUT

Support intestinal balance to inhibit or eliminate harmful pathogens from infiltrating the body.

- ✓ Acid LAC™
- ✓ FORMYL™

# SOLUTIONS FOR RUMINANTS

**Help your livestock perform at the highest level and improve their overall health.**

**Establish the intestinal integrity and protection your animals need by using our**

**Gut Health Triple Check program.**

## Acid LAC™

Acid LAC is a unique combination of effective organic acids. It has been proven to control a broad spectrum of pathogenic bacteria in drinking water. By reducing the pathogen load in the water, there are fewer challenges presented to the animal, which helps maintain gut health.

## Ammo CURB® 85

Ammo CURB 85 is a low-cost feed preservative for processed feed ingredients, complete animal feeds and total mixed rations (TMR). It may be added directly to complete feed, feed ingredients and total mixed ration (TMR) to help maintain stability during short-term storage.

## CURB® RM Extra

CURB RM Extra is a blend of formaldehyde and propionic acid designed to protect feed and feed ingredients from mold development.

## ENDOX®

ENDOX was formulated specifically to protect finished feeds by safeguarding fat-soluble vitamins against degradation, protecting complete feeds from fat oxidation, vitamin loss and more.

## Feed CURB®

Feed CURB is a proprietary blend of four powerful organic acids — propionic, acetic, benzoic and sorbic. It is specifically formulated to control mold and wild yeast species in feed ingredients, texturized feed and total mixed rations (TMR).

## FORMYL™

FORMYL is a free-flowing micro-encapsulated source of formic and citric acid. Formic acid helps reduce GI tract pH while reducing bacterial contamination.

## KALLSIL™

KALLSIL reduces caking in feed by absorbing moisture. This results in improved flow in feed ingredients to prevent feed from hanging to the sides of the bins or feeders.

## KemTRACE® Chromium

KemTRACE Chromium — the first product of its kind on the market — is a safe, proven trace mineral. This highly bioavailable, organic source of chromium propionate helps to reduce the negative effects of stress and improve glucose utilization.

## Myco CURB®

Myco CURB is a mold inhibitor for feed, formulated to inhibit mold growth in processed feed ingredients, complete feed and TMR. Myco CURB contains propionic acid blended with sorbic and benzoic acids and is buffered for improved equipment and employee safety.

## RENDOX®

RENDOX stabilizes animal fats and protein meals during the rendering process with antioxidants to maintain product freshness, protect product quality, and increase product shelf life.
