INSTRUCTIONS FOR USE

THIS PRODUCT IS A CONCENTRATE AND MUST BE DILUTED BEFORE USING.

Use dilution immediately – Do not store diluted solution.

Dilute TetraCURB MAX for your respective need following the dilution table. A minimum of 100 gallons of finished solution to treat 1 acre. Spray plants with diluted solution to achieve complete coverage until runoff. The use of surfactants, adjuvants, and/or penetrants is not required when using this product. For best results, use in an IPM program with a minimum of 2-3 applications over 2 weeks.

NOTE: Since plant varieties are numerous and may react differently to TetraCURB MAX, test the product on a small scale before making large-scale applications. Do not apply on plants when the temperature is 90° F or above.
