

DailyZz™ for Better Sleep and Next-day Function^{^5*}

Everyone knows that quality sleep is essential for life, health and happiness—but many of us don't get enough of it. A 2020 global survey with more than 26,000 consumers including the US and Europe found that 55% of consumers were unhappy with the daily amount of sleep and around 50% with the quality of their daily sleep.¹

Consumers spend billions on sleep aids every year, but many prefer natural solutions.² Many products either don't work well or rely on sedation that generally impairs daytime function.³ This gap is a huge opportunity in the growing global market for natural sleep support, which is expected to reach \$1.5 billion by 2022.⁴

WAKE UP TO THE DIFFERENCE

- ✓ Clinically studied, statistically significant health benefits
- ✓ 100% natural, safe and non-habit forming
- ✓ Numerous product formats and ingredient combination possibilities

INTRODUCING DailyZz™

DailyZz™ is a natural, proprietary botanical blend that clinical research shows can significantly improve both sleep quality and next-day functioning in seven to 14 days.⁵ DailyZz™ combines water-extracts of spearmint and green tea rich in naturally occurring polyphenols that promote healthy sleep for a better next day.

CLINICAL RESEARCH: DailyZz™ IMPROVES SLEEP QUALITY & DAILY FUNCTION

A new sleep study found that DailyZz™ significantly improved the sleep quality and next-day function of healthy adults who had occasional sleep complaints.⁷ These exciting benefits make DailyZz™ the first clinically studied, natural, nightly solution for a quality next day. University of Arizona researchers conducted the randomized, double-blind clinical trial with 100 healthy adults, ages 22-50. Participants either received 485 mg of DailyZz™ or a placebo 30 minutes before bed.

Outcomes were measured by various rigorous testing methods including computerized performance testing and validated sleep diary surveys, the gold standard for assessing the subjective sleep experience, that showed statistically significant improvements for people taking DailyZz™ compared to placebo.^{^#8}

THE SCIENCE OF SLEEP

Sleep plays an important role in mind-body interactions essential to overall health and well-being. Sleep triggers a host of biological activities that profoundly affect almost every cell, system and function in the body.⁶ Seven hours of sleep each night is not only optimal for adults; our bodies cannot function properly without it.

Sleep is Essential to Body and Mind Functions

- Cell growth & repair
- Energy levels
- Appetite & body weight
- Blood pressure & cardiovascular health
- Immune system
- Learning
- Memory
- Problem-solving
- Concentration
- Mood
