

SWINE GUT HEALTH TRIPLE CHECK

Establish the intestinal integrity and protection your pigs need, using our **Gut Health Triple Check** program.

The Gut Health Triple Check program serves as a support system to **CLEAN UP** contaminants in feed and water prior to animal exposure, **BUILD UP** intestinal strength and immunity to reduce leaky gut and **KNOCK OUT** harmful pathogens for healthier and better performing pigs.

CLEAN UP

Target specific profit-robbing contaminants in fat, grain, water and finished feed.

- ✓ ENDOX®
- ✓ Acid LAC™
- ✓ KALLSIL™
- ✓ CURB® AF
- ✓ Myco CURB®
- ✓ CURB® RM Extra
- ✓ Ammo CURB® 85
- ✓ RENDOX®

BUILD UP

Strengthen the intestinal barrier and immune system to maximize nutrient absorption and inhibit harmful pathogens or toxins.

- ✓ LYISOFORTE®
- ✓ KemTRACE® Chromium

KNOCK OUT

Support intestinal balance to inhibit or eliminate harmful pathogens from infiltrating the body.

- ✓ Acid LAC™
- ✓ KEM-GEST™
- ✓ FORMYL™

SOLUTIONS FOR SWINE

Help each pig reach its full production potential. Establish the intestinal integrity and protection your pigs need using our Gut Health Triple Check program.

Acid LAC™

Acid LAC is a unique combination of effective organic acids. It has been proven to control a broad spectrum of pathogenic bacteria in drinking water. By reducing the pathogen load in the water, there are fewer challenges presented to the animal, which helps maintain gut health.

Ammo CURB® 85

Ammo CURB 85 is a buffered mold inhibitor for processed feed ingredients and livestock feeds.

CURB® AF

CURB AF is a formaldehyde solution that maintains quality of complete feed and ingredients.

CURB® RM Extra

CURB RM Extra is a blend of formaldehyde and propionic acid designed to protect feed and feed ingredients from mold development.

ENDOX®

ENDOX was formulated specifically to protect finished feeds by safeguarding fat-soluble vitamins against degradation, protecting complete feeds from fat oxidation, vitamin loss and more.

FORMYL™

FORMYL is a free-flowing micro-encapsulated source of formic and citric acid. Formic acid helps reduce GI tract pH while reducing bacterial contamination.

KALLSIL™

KALLSIL reduces caking in swine feed by absorbing moisture. This results in improved flow in feed ingredients to prevent feed from hanging to the sides of the bins or feeders.

KEM-GEST™

KEM-GEST is a blend of organic and inorganic acids designed to provide an economical means to acidify swine feed. This multi-acid approach helps protect a pig's GI tract from growth-limiting pathogens. Inhibition of pathogens promotes better gut health and production efficiency.

KemTRACE® Chromium

KemTRACE Chromium — the first product of its kind on the market — is a safe, proven trace mineral. This highly bioavailable, organic source of chromium propionate helps to reduce the negative effects of stress and improve glucose utilization.

LYSOFORTE®

LYSOFORTE is a nutritional emulsifier designed to enhance digestion and absorption of energy-rich feed ingredients, including fats, oils and fat-soluble nutrients. Lysolecithins in LYSOFORTE help to reduce the energy required for fat digestion, thereby maximizing feed efficiency and providing better feed cost control.

Myco CURB®

Myco CURB is a mold inhibitor for feed, formulated to inhibit mold growth in processed feed ingredients, complete feed and total mixed rations (TMR). Myco CURB contains propionic acid blended with sorbic and benzoic acids and is buffered for improved equipment and employee safety.

RENDOX®

RENDOX stabilizes animal fats and protein meals during the rendering process with antioxidants to maintain product freshness, protect product quality, and increase product shelf life.
