QUANTAVENE™ 500 CONCENTRATE

CODE NUMBER

016931

DESCRIPTION

A proprietary blend of organic acids and copper propionate to clean stains caused by algae on greenhouse floors, benches, walkways, capillary matting, cooling pads and walls. Patent pending.

INGREDIENTS

Propionic Acid, Water, Ammonium Propionate, Copper Propionate, Acetic Acid, Sodium Hydroxide, Sodium Benzoate, Sorbic Acid, Methyl Paraben, Propyl Paraben and Lemon Oil Terpenes.

QUALITY SPECIFICATIONS	
pH	5 - 6
Specific gravity	1.01 – 1.09
Refractive index	1.40 – 1.41 @ 21.5 °C
TYPICAL CHARACTERISTICS	
Color	Blue
Odor	Slight Lemon and Acidic
Weight per gallon	8.64 lbs/gal

INSTRUCTIONS FOR USE

THIS PRODUCT IS A CONCENTRATE AND MUST BE DILUTED BEFORE USING. Use dilution immediately – Do not store diluted solution

Pressure wash surface to be cleaned. Dilute Quantavene at 4-6 fluid ounces per 1 gallon of clean water. Apply diluted Quantavene solution until runoff. Allow to dry before irrigation. Initially apply weekly for at least three weeks or until stains are removed, whichever is longer, and monthly thereafter.

STORAGE

Store in a well-ventilated, cool, dry place (20 – 25 °C). Do not freeze. Keep container closed when not in use.

STABILITY

Shelf life is 24 months unopened under proper storage conditions.
